## **FOR IMMEDIATE RELEASE**

September 12, 2025

### **ADVANCED EQUIPMENT SALES ACQUIRED BY RECYCLING EQUIPMENT INC.**

Souderton, PA, September 10, 2025 – Advanced Equipment Sales (AES), a leader in custom air conveyance and baling and dust control systems, announced today that it has been acquired by Recycling Equipment Inc. (REI), based in Newton, NC. With the addition of AES, REI now operates from three locations: Newton, NC; Fort Worth, TX; and Souderton, PA.

Founded in 1989, AES has built a reputation for engineering, building, and maintaining efficient scrap handling and baling systems that improve profitability and sustainability for their customers. Under the new partnership, AES will continue operations in Souderton with founders Jeff and Jill Dietterich remaining in leadership roles.

"We are excited to join forces with REI and see this as an incredible opportunity for AES, our employees, and our customers," said Jeff Dietterich, President. "Together, we will expand our capabilities and deliver even greater value to the industries we serve."

AES looks forward to continuing its work with expanded resources as part of the REI family.

### **About AES**

Advanced Equipment Sales, founded in 1989 and based in Souderton, PA, is a full-service provider of integrated conveyance systems specializing in scrap, trim, and dust. AES engineers and supports custom scrap systems that help businesses achieve greater profitability, productivity, and sustainability.
